

NC-1

Network Card

Description

The NC-1 network card is used with the NM-C16 Master Network Module(16-Channel) and connects to the NM-R1 Slave Network Module via optical fiber, enabling optical fiber networking between GST-FT64(W) Fire Telephone Panel.

Technical Specification

Operating Power Supply	DC5V (powered by NM-C16 networking module)
Power Consumption	≤5W
Transmission Rate	10M/100M full-duplex, half-duplex fully adaptive
Transmission Distance	0-20km
Wavelength	1310nm
Optical Fiber Interface	FC interface
Optical Fiber Type	Single-mode single fiber
Working Environment	0°C -40°C, ≤95%RH, Non-condensing
Dimension	187mm(L)×145mm(W)×26mm(H)

Installation & Terminals

Insert into NM-C16.

LNK	Connect to NC series switches via RJ45 network cable
TX	Connect to NM-R1 Master Network Module(1-Channel) via optical fiber
P1-4	Connect to audio interface of NM-C16 Master Network Module(16-Channel)

Ordering Information

Part No.	NC-1
Device Name	Network Card
Product No.	30500412
