

NS-9

Switch (9-Channel)

Description

The NS-9 Switch(9-Channel) connects the NM-C16 Master Network Module(16-Channel) and the NC-1 Network Card to provide the network signal for the GST-FT64(W) Fire Telephone Panel system and realize the optical fiber networking between the panels.

Technical Specification

Operating Power Supply	AC220V
Transmission Rate	10M/100M full-duplex, half-duplex fully adaptive
Port quantity	Nine 10/100M auto-sensing RJ45 ports
MAC address table	2K
Working Environment	0°C -40°C, ≤95%RH, Non-condensing
Dimension	440mm(L)×120mm(W)×44mm(H)

Installation & Terminals

Wall-mounted installation or cabinet-mounted installation (through the installation bracket).

Power interface	Connect AC220V to DC5V power adapter
RJ45 ports	Nine, 1 is connected to the networking module, and the other 8 are connected to the NC-1 network card
Indicator	1 power light, 9 Link lights

Ordering Information

Part No.	NS-9
Device Name	Switch (9-Channel)
Product No.	30500415
